

Mullite Fiber Bulk

Description

REF – MFBulk is manufactured from high purity alumina powder by spun processes suitable for industrial applications to withstand temperatures of up to 2912°F. It's the base materials to produce blanket, board, paper, shaped and textiles.

Classifications

REF – MFBulk 2912

Features

Low thermal conductivity
Low heat storage
High temperature resistance

Applications

Raw material of board, paper etc
Expansion joint packing
Sealing materials in high temperature

Classification	MFBulk 2912
Classification Temp(°F)	2912
Color	White
Al ₂ O ₃	≥72
Fiber Diameter(um)	2-4
Shot Content(%)	≤15
